Admin messages.php

```sql
SELECT
        m.id,
        m.message,
        u.name,
        u.number,
        u.email
    FROM
        messages m
    LEFT JOIN
        users u ON m.user_id = u.id
    ORDER BY
        m.created_at DESC
```

Placed_orders.php

```sql
SELECT o.*, r.name AS rider_name, r.email AS rider_email
        FROM orders o
        LEFT JOIN riders r ON o.rider_id = r.id
        ORDER BY placed_on DESC
```

Product.php

```sql
SELECT p.*, ci.carbon_value
        FROM `products` p
        LEFT JOIN `carbon_impact` ci ON p.id = ci.product_id
        WHERE p.deleted_at IS NULL
        ORDER BY p.created_at DESC
```

Cart.php:
(Fetch cart items with product details and carbon impact)

```sql
SELECT c.id AS cart_id, c.quantity,
                    p.id AS product_id, p.name, p.price, p.image,
p.category, p.calories,
                    ci.carbon_value
            FROM cart c
            JOIN products p ON c.product_id = p.id
            LEFT JOIN carbon_impact ci ON p.id = ci.product_id
            WHERE c.user_id = ? AND p.deleted_at IS NULL
```

Category.php:

```sql
SELECT p.*, ci.carbon_value
            FROM `products` p
            LEFT JOIN `carbon_impact` ci ON p.id = ci.product_id
            WHERE p.category = ? AND p.deleted_at IS NULL
```

Checkout.php

(check for Green Tag Products in the cart)

```sql
SELECT COUNT(c.product_id)
    FROM cart c
    JOIN products p ON c.product_id = p.id
    WHERE c.user_id = ? AND p.is_green = 1
```

(calculate all totals)

```sql
SELECT c.quantity, p.price, p.calories, ci.carbon_value
    FROM cart c
    JOIN products p ON c.product_id = p.id
    LEFT JOIN carbon_impact ci ON p.id = ci.product_id
    WHERE c.user_id = ? AND p.deleted_at IS NULL
```

Menu.php

(Join products with carbon_impact)

```sql
SELECT p.*, ci.carbon_value
            FROM `products` p
            LEFT JOIN `carbon_impact` ci ON p.id = ci.product_id
            WHERE p.deleted_at IS NULL
```

Quick_view.php

(Join products with carbon_impact for data (is_green, calories, carbon_value))

```sql
SELECT p.*, ci.carbon_value
        FROM `products` p
        LEFT JOIN `carbon_impact` ci ON p.id = ci.product_id
        WHERE p.id = ? AND p.deleted_at IS NULL
```
